

# Professional Agile Leadership

Helping Leaders Understand their Role and Enabling Others

Becoming an agile organization is a profound transformation that requires senior leaders, middle managers, and agile team members to change the way that they organize their work, manage that work, and measure the results of the work. Agile teams cannot do this on their own; they need help from the entire organization. The changes for all involved are profound, but so are the results when everyone's goals and ways of working are aligned.

Leaders and managers are critical enablers in helping their organizations be successful, yet the role of leaders and managers in an agile organization can be quite different from what they are used to. To succeed in a changing world, organizations need to become more agile, more responsive to customer needs and market changes

## TOPICS

- Theory and Principles
- Improving Value Delivery
- Value - The "What"
- Culture - The "Who"
- Professionalism - The "How"
- Agile Maturity and Delegation
- Increasing agility within an organization
- Scaling
- Evidence-Based Management

## CERTIFICATION

This Scrum.org accredited course is part of the business agility path. Participants will receive a code to take the PAL-E online certification assessment at the end of the course.

## OBJECTIVES

This workshop will equip leaders and managers to help their organizations change by providing participants with:

- An understanding of how agility can help you improve your organization's performance
- An understanding of how you, as a manager or leader, can help your organization achieve the benefits of agility
- An understanding of how culture and values influence your organization's ability to reap the benefits of agility
- Practical skills for helping to guide and coach agile teams, and to help them remove impediments
- An understanding of how to measure the benefits and impacts of agility in your organization

## AUDIENCE

This course was designed for managers and those in leadership roles who are responsible for the introduction and establishment of Agile methods and techniques in an organization/division

## LOGISTICS

Length: 2 Days  
Max. 20 Participants  
Live Instructor  
(In-Person or Virtual)
